

# Powerpack 300+

Keeping you powered wherever you are

Portable  
Power  
Technology

Compact, lightweight and powerful...  
The new all-in-one Powerpack 300+ delivers AC  
and DC power wherever and whenever you need it

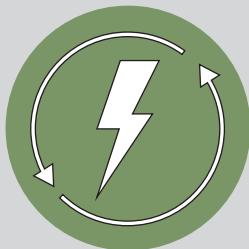

Quiet and innovative  
portable power that's  
perfect for off grid  
outdoor activities,  
cabins, garages, market  
stalls and for backup  
during a power cut.

## Features:

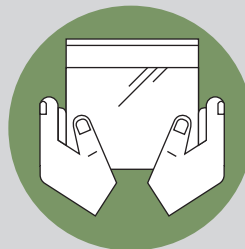

- Small and Powerful - high quality branded Lithium-Ion provides 465 Watt Hour (Wh) of battery capacity
- Portable energy that's quiet and efficient with a class leading 126 Wh per Kg
- Clean pure sinewave inverter output (230V) powers loads up to 300W
- UPS function provides automatic transfer of load to battery without interruption during a power cut
- Integrated AC charger makes it safe and easy use
- Solar charging compatible that lets you plug in up to 350W of solar without external controller
- USB ports for mobile charging and powering USB devices
- Integral super bright 2W LED lamp

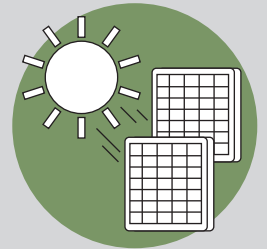

Ideal for off grid and  
remote location

Ideal back up power

Portable

Solar rechargeable

## Other Specifications:

- Plug and Play – Safe and easy to use with built in fault detection, overload and low battery alarm
- Lightweight design of 3.7Kg and 465Wh capacity gives industry leading energy density
- Small and compact size of just 340 x 185 x 60 mm
- Pure sinewave inverter output makes powering even sensitive and inductive loads easy
- Rechargeable easily from plugging into the mains and the Sun
- Designed in the UK
