

Lithium Battery

M Series lithium battery

48VDC 50AH

48VDC M series lithium Iron Phosphate battery module can be used for mobile energy systems, which features light weight, high power and exceptional performance in cycling.

Supporting up to 1C continuous discharge current, M series lithium battery is perfect to be used for high power appliance assuring you make full use of designed energy from storage battery. It has built-in BMS against overcharging, over discharging or over temperature by monitoring current, voltage and temperature of each cell. Featuring high cycle life and high discharging capability, M series lithium battery could offer significant value for end user with lower total ownership cost.

- Long cycle life, over 2500 cycles at 100% DOD @25°C
- Maintenance free with very low self-discharge rate
- Supports high discharge current (max 1C)
- More usable energy up to 100% capacity
- Partial state of charge tolerant, with no damage from PSoC
- Built-in BMS with automatic balancing and protection against over-charge, over discharge, and over-temperature
- Capability of parallel up to 12 pcs
- Environment friendly : No toxic, no acid can be installed in any direction
- Support CAN communication

Model No.	M48-50
-----------	--------

Electrical

Nominal voltage (Vdc)	48	
Nominal capacity (AH)	50	
Energy (KWH)	2.4	
Charging @25°C	Charge voltage	52.5~54
	Max.Charge current	50
Discharging @25°C	Max Discharge current(A)	50
	Discharge Cut-off voltage(V)	42
Operating temperature	Charging	0~55
	Discharging	-20°C ~ +55°C
Operating humidity	60 ± 25% RH, Non-condensing	
Certifications	CE / UN 38.3	
Dimensions (L*W*H)(mm)	368*216*343	
Weight (Kg)	30.4
